

Inventory Management Software

Inventory management is like a life line of any manufacturing or goods trading company. Inventory management helps in maintaining the data of goods purchased, sold, or traded. It helps them to maintain goods categories, goods sub-categories, purchase invoices, sales invoices, returns, refunds, stock balance, taxes, reports.

Inventory management is very important aspect for both manufacturing and goods trading companies. And an effective management leads them to the increased profit margins. Un-necessary storing of neither finished products nor raw material is beneficial to the company.

Inventory Management Software has following Features

- Product Category Management
- Product Management
- Purchase Management
- Sales Management
- Stock Management
- Warehouse Management
- Sales Return Management
- Refund Product Management
- Invoice Processing
- Report

NQS Technology approach is to take your project, and break it up into modules to quickly decide on your exact requirements. We will then build a quote, and a project plan after the work is agreed on
